Daily volume

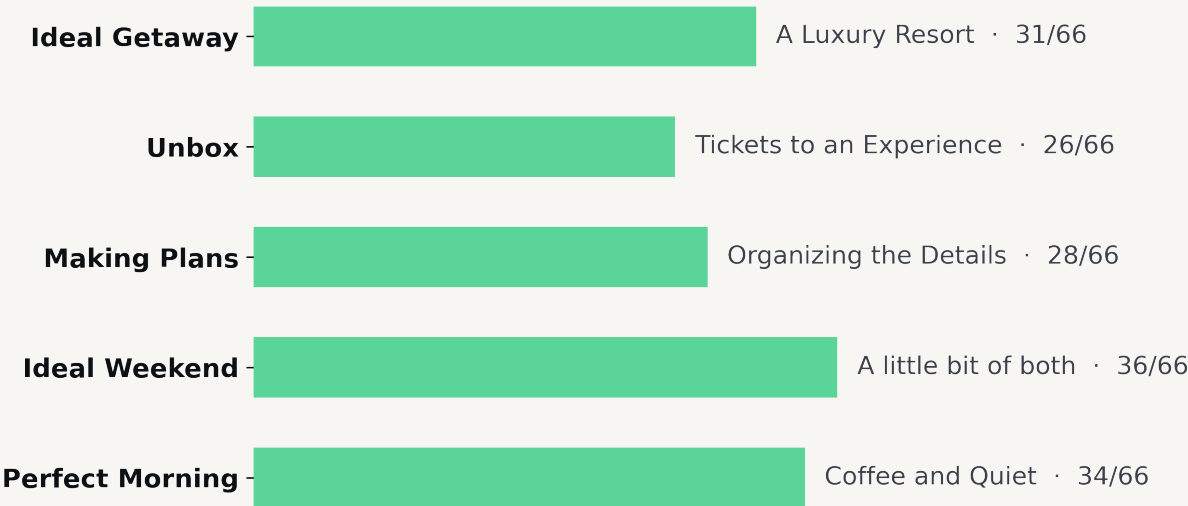

sessions recorded per day (Arizona Time)

Lexus ES (“Flow” energy) dominates at 24 of 66 results (36%), with RX (“Regeneration”) second at 20 (30%) — together 67% of all Arizona matches. Volume peaked on Jul 23 (29 sessions) and tapered through Jul 26. Activity clusters between 9 AM–6 PM Arizona time — consistent with a daytime activation.

How Arizona Answered the Quiz

Most common answer per question

The Arizona profile skews toward comfort and structure: “A Luxury Resort” getaways (31/66), “Tickets to an Experience” over physical goods (26/66), and a planning style led by “Organizing the Details” (28/66). The strongest single signal is Q4: 36 of 66 chose “A little bit of both” for their ideal weekend — a balanced-lifestyle audience, which aligns with ES/“Flow” being the top result.

DATA QUALITY NOTES

(1) 7 of 66 sessions show durations over 10 minutes (max ~1.8 hrs) — kiosk sessions likely left open; excluded from the median. (2) Source timestamps were recorded in India Standard Time (IST, UTC+5:30) and have been converted to US Mountain Standard Time (Arizona, MST, UTC-7, no daylight saving) — a 12.5-hour shift back — for the “Started” column in the appendix. (3) All 66 rows carry a complete Arizona region tag and full geolocation; no untagged or ambiguous rows were present in this dataset. (4) The source file has no city-level field, so no city breakdown is reported.

All Arizona Sessions

All 66 Arizona sessions, chronological (Arizona Time). Durations over 10 minutes shown in hours. Q1 Getaway · Q2 Unbox · Q3 Plans · Q4 Weekend · Q5 Morning (answers abbreviated).
