Model results

which Lexus each participant matched

Daily volume

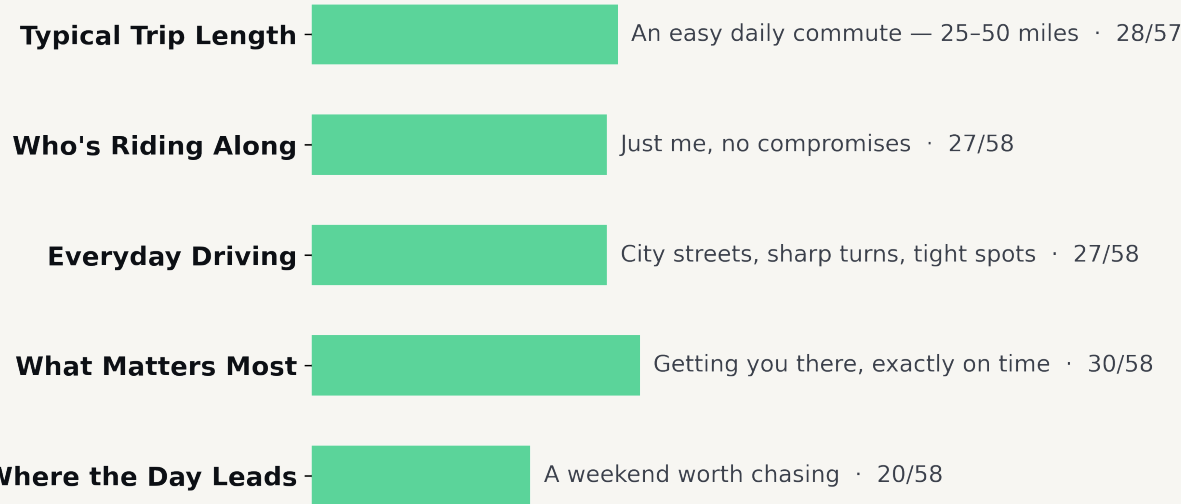

sessions recorded per day (Eastern Time)

Lexus RZ (“Future” energy) leads at 17 of 58 results (29%), with ES (“Flow”) second at 14 (24%) — together 53% of all Ohio matches. Volume peaked on Aug 20 (41 sessions) and tapered through Aug 23. Activity clusters between 9 AM–8 PM Eastern Time — consistent with a daytime, commute-hours activation.

How Ohio Answered the Quiz

Most common answer per question

The Ohio profile skews toward everyday, close-to-home driving: a “An easy daily commute — 25–50 miles” is the most common trip length (28/58), most riders travel “Just me, no compromises” (27/58), and everyday driving is dominated by “City streets, sharp turns, tight spots” (27/58). The strongest single signal is Q4: 30 of 58 said “Getting you there, exactly on time” matters most — a punctuality-first audience, which aligns with RZ/“Future” being the top result.

DATA QUALITY NOTES

(1) 5 of 58 sessions show durations over 10 minutes (max ~4.1 hrs) — kiosk sessions likely left open; excluded from the median. (2) Source timestamps were recorded in India Standard Time (IST, UTC+5:30) and have been converted to US Eastern Time (Ohio, EDT, UTC-4) — a 9.5-hour shift back — for the “Started” column in the appendix. (3) All 58 rows carry a complete Ohio region tag. (4) 1 session has a blank Q1 response (shown as “N/A” in the appendix) and is excluded from the Q1 tally above.

All Ohio Sessions

All 58 Ohio sessions, chronological (Eastern Time). Durations over 10 minutes shown in hours. Q1 Trip Length · Q2 Passengers · Q3 Everyday Driving · Q4 Priority · Q5 Weekend (answers abbreviated).
